English

PROFILE

I am an experienced information technology admin well versed in infrastructure and daily operations management. Currently I am studying computer science and full stack development and I am very passionate about programming. I am looking for a **Web Developer** position (as a **student or full-time**).

WORK EXPERIENCE

IT Administrator

Menora Mivtachim Insurance

2018 - 2021

- I increased the efficiency of automation processes for all employees of the organization, while maintaining continuous security updates using **IBM BigFix**.
- Together with the team of colleagues we improved and created more comfortable and faster virtual environments for the organization's sales centers using **VMware vSphere**.
- I helped comprehensively in improving the technical hotline when handling technical malfunctions, such as malfunctions in company internal systems, connection of endpoints, Group Policy management and users malfunctions in **Active Directory**.
- I contributed to the improvement of the **quality of the service** in technical malfunctions towards all the company's employees, agents and managers.

PROJECTS

Coding Challenges

[Live Demo](#) | [Source](#)

Developing a Front-End platform for displaying algorithmic challenges, such as Algorithm visualizers and games using **Typescript, JavaScript, HTML, CSS, jQuery**, and **Bootstrap**.

Assembler Compiler

[Download](#) | [Source](#)

Developed software that compiles an Assembly code into a unique binary form, using the **C Programming Language** on the **Ubuntu Operating System**.

Samurai - 2D Adventure Game

[Download](#) | [Source](#)

Developed a 2D Adventure game using the **C# Programming Language** with **Object-oriented programming (OOP) principles** on the **Unity Engine**.
